STF1 Explanatory Note

The 1990 U.S. Census has released STF1 (Summary Tape File 1) data taken from short census forms collected from all persons and housing units on April 1, 1990 (the so-called 100-Percent Component). These data cover:

Population	Housing
Race	Vacancy characteristics
Hispanic origin	Tenure (owned or rented)
Age	Group quarters
Sex	Value of home/Monthly rent
Marital Status	Number of units in structure
Household relationship	Number of rooms in unit

These data do not include items from the Sample Component, the long forms completed by one household in 6, which are targetted for release in 1992 as STF3. STF3 data items cover many additional aspects, including income, education, occupation, ancestry, migration, as well as more detailed housing unit characteristics including condominium status.

The BRA Research Dept. has tallied the STF1 findings by 1990 Census block groups into Boston's 16 planning districts. The State Data Center, Mass. Inst. for Social and Economic Research (MISER), UMass/Amherst printed the accompanying eight page profiles of each planning district.

Tallies may vary by up to 0.2 percent, or 2 in 1,000 from final counts because some planning district divisions straddle individual census block groups. In these instances, the tallies were apportioned on the basis of the average of the 100 percent population and housing counts assigned to each portion.
